

Important Recall Information

Dear customer,

In cooperation with the U.S Consumer Product Safety Commission, we are writing to inform you of our voluntary recall associated with the Projecting Finger Light Toys we sold online at Temu.com from December 2025 through April 2026.

This recall involves Space Astronaut LED Finger Lights. They were sold in sets of 28 or 30 multi-colored lights and with 30 astronaut cards. Each finger light has three internal button cell batteries that power astronaut projections when activated.

The recalled LED finger lights violate the mandatory safety standard for toys because they contain button cell batteries that can be easily accessed by children. If button cell or coin batteries are swallowed, the ingested batteries can cause serious injuries, including internal chemical burns, and death.

Please stop using the recalled toys immediately, take them away from children and contact Syera for a full refund. Consumers will be asked to remove and properly dispose of the finger lights into the trash and send a photo of the disposed product to syerarecallusa@outlook.com.

Please note that button cell batteries are hazardous, and should be disposed of or recycled by following local hazardous waste procedures.

For questions, please email syerarecallusa@outlook.com or contact us by replying to this message.

Best Regards,
Syera
